Curriculum Information Letter – Year 4 2024-2025 – Autumn 2

Dear Parents and Carers,

Here is an outline of your child's learning this half-term:

Curriculum Plan for 2024-2025 Autumn 2	
English	The children's learning will be based on <i>Winter's Child</i> and <i>The Frost Goblin</i> . Can you help them to build up a bank of wintry words? Both of our texts are set in the depths of frozen winters. Children will be writing and publishing a character description, additional scene, script writing and explanation text using grammar and punctuation skills learnt during the week.
Mathematics	Learning will continue with Addition and subtraction, as well as an introduction to measurement (area). Most of Maths this term will be centered around multiplication and division. By the end of Year 4, the children will ideally know all of their times tables up to 12 x 12. On the following page I have inserted a visual of all of the times table facts the children will be learning between now and then.
Science	The children will learn about electricity and circuits.
Computing	Your child will be learning about editing audio.
Humanities: History	The class will be studying the Anglo-Saxons.
RE	The big question: <i>Is the Christmas message of peace still relevant in today's world?</i>
PSHCE	We'll be following the Camden Scheme of Work for PSHCE and learning about the risks and harmful effects of alcohol and drugs.
PE	The children will be learning gymnastics (different combination of actions through the theme of flight).
Art	Year 4 be learning about collage and the artist Gaudi.
Music	Our class will continue learning how to play the recorder with weekly lessons.
Homework	Reading: The children need to bring their completed Reading Record to school daily, as well as the reading book that they have currently got borrowed from school. Children are required to read daily and write a small summary about what they have read. Spelling: Each week your child will be given a set of spellings to learn and revise. It is a good way to also practice their handwriting by tracing and independently writing the spelling word. IXL: Both literacy and maths homework will be set weekly on IXL every Tuesday. Children will have a week to complete the tasks in their homework folder and online.
Trips	Trip to the cinema

How Can You Help?

At this age-range, one of the very best things to do with your children is to help them build their vocabulary. Make lists of related words, find synonyms of words, play word games in the car, ask them to keep a journal of new words that they pick up when they go somewhere new, play hangman with interesting words as the answer, ask them to find tricky words in their reading book and talk to them about meaning. Words, words, words!

Times tables practice is essential too. Please see below for a visual of all of the multiplication facts that the children need to be familiar with by the end of Year 4. Could you focus on a different times table every week with them? A great way of doing this is to make up silly songs to help them commit their times tables facts to memory. For example, could they make up a song that details all of their 6 times table to the tune of *Match of the Day* or *Peppa Pig*?

Thanks for your support,

Best wishes

Affia
